About me

Final year student in Computer Engineering, whose goal is to grow as a person and as a professional using the acquired knowledge in the field of IT. Highly interested in software development and programming.

I consider myself as a commited, responsible and positive person, always looking to grow and improve day by day. I believe that the most important thing in a professional carreer is to have motivation and willingness to learn to be able to give the best, enhance skills and be productive.

Currently working on the Final Degree Project "Models for data prediction of a unit of uro-oncology", where Machine Learning techniques will be used for the prediction models.

Education

2017 – 2022	**Degree in Computer Science Engineering** in Complutense University of Madrid.
